

Release Notes

Product	MW2900
VERSION:	2.3.0.0
COMPATIBILITY:	No known backward compatibility issues.
NEW FEATURES:	<p>The following new features are included in this release:</p> <p>Added color space conversion command INputCoLoRSPaCe to support conversion from YUV. Support for BT601 color space (standard definition) and the extended BT709 (HDTV) color space is provided.</p> <p>In addition the ability to convert an input to Monochrome format is provided.</p> <p>Updated timing table to support JVC 4k display (1080p timing)</p> <p>Added a frame buffer command (WINBUFFerTYPE) to allow user to select different frame buffer modes when specific input output frame rates encountered causing pointer crossing issues (advanced feature).</p>
CHANGES:	<p>The following changes are included in this release.</p> <p>Changed the hardware configuration to increase the scaler bandwidth to improve image quality with output rates greater than 1920x1080. This eliminates redundant filtering and provides unfiltered 1:1 mapping of windows into the output space.</p> <p>Deleted redundant OutPutBitsPerPixel command.</p> <p>Command line help message omits information on one field of the INputPhase command.</p>
BUG FIXES:	<p>The following bug fixes are included in this release.</p> <p>Resolved an issue with the intermittent display of a column of “dots” at the right or left hand edge of an output. When this issue appeared on the right hand edge of output 1 or 3 this had the appearance of a vertical seam.</p> <p>Resolved issue with output fade command that caused the image to tear during a fade. Also improved the smoothness of fade.</p> <p>Increased size of command line response buffer to resolve an issue causing preset list to be cut off at the 40th entry</p> <p>Addressed a bug where Autosync supported only 100 timings of the 160 required.</p> <p>Window Control Panel (WCP) – message informs user to restart WCP following change to password.</p> <p>WCP – improved port handling</p>
KNOWN ISSUES:	<p>BP16 control panel locks up when doing preset recall when number of presets exceeds sixteen.</p> <p>The color space command is not supported in WCP</p> <p>Centered or right justified labels may not align properly when window is wider than the wall width.</p>
